

## PROJECT DESCRIPTION

Client: CarKleen Australia

Description: Total Construction completed the demolition and refurbishment of six Coles Express site's located throughout Melbourne Metropolitan and Country Victoria to a total value of \$1 million.

The work at each site required the removal of the old obsolete car wash machines before commencement of new work. This work involved the rebuilding of plant rooms including all hydraulics and electrical wiring, new switchboards, concreting of the old chain pits and refurbishment of all surfaces to enable full epoxy coating to waterproof all walls and floors of the site.

Programming of the construction was completed in conjunction with the car wash installation to save time and sequenced in such a way that enabled the sites to remain open throughout the refurbishment project.

Project Cost: \$1million

Date: December 2005
