

Project  
Currumbin Private  
Hospital

Location  
Currumbin, QLD

Client:  
Healthe Care Australia

Project Status:  
Preliminary stages

The Currumbin Private Hospital project is an \$8m redevelopment/ refurbishment of an existing facility. The client for the project is Healthe Care Australia.

Total Construction will undertake the works as a D&C contract.

The contracted works consist of a new two level car parking facility (lower ground and ground level) which entails bored pier retention and excavation to the lower ground floor. A temporary car park will be utilised on the neighbouring property whilst these works are undertaken.

There is also renovation and modernisation of the existing facility. This will be a staged process to accommodate the client whilst the hospital remains in operation.

Additionally, a new extension will be added to the existing facility. The extension comprises a two level hospital facility with nurse's stations and wards. The lower ground will also accommodate more parking.

To date Total Construction are doing minor works to enable the major construction process.

Projected completion estimated Mid 2012.

New undercroft car park
