Completion

May 2010

Total Construction was awarded a design and construct contract for this project with the brief of refurbishing three existing classrooms and increasing the current learning space by an additional three classrooms. This required the demolition of two existing portable classrooms and the construction of a new two-storey block with five new classrooms and a common learning space. Total Construction engaged Spowers Architects to work with us on this on design.

Work was completed in two concurrent stages. The main work comprised the construction of five new classrooms and learning/ common areas which took 6 months. Refurbishment of the existing classrooms was completed during the Christmas school holidays.

The new building features sustainable design with an attractive colour scheme and is sure to ignite the creative imagination of the pupils. A major feature of the building is the external screen which sets the building apart from the rest of its surroundings.
