St. Lawrence Primary School is located in the newly developed suburb of Derrimut, VIC.

This new school was constructed as a Building the Education Revolution project launched by the Government to provide educational services for approximately 150 students. The school consists of two main buildings for Administration Services and a Junior Learning Cluster, a playground and car parking facilities.

The main structures of the buildings are constructed with steel portal frames and perimeter block wall covered with wall cladding. High bay windows in the Junior Learning Centre provide additional lighting for the Central Common area, which is used for prayers. The full height windows enhance the perimeter of the buildings. The two main buildings are connected by a covered walkway. The internal of the buildings was built up with suspended and plasterboard ceilings with a mixture of colours, vinyl for wet areas and carpets for classrooms, offices and hallways.
