July 2005

The Royal Melbourne Institute of Technology is a unique and architecturally renowned university in the heart of Melbourne's CBD.

Total Construction was contracted to refurbish a section of Level 11 to facilitate new state of the art Games Laboratories and a Computer Studio. This involved the demolition of existing classrooms to create an area to educate a new generation of students in Computer Technology.

The work involved the installation of new joinery, upgrading of all services and called for the creative use of exposed cabling and ducting.

The design also required artistic flair and as such, the room was finished with modern fittings and accessories.

The project was carried out around students and staff which required a well planned approach to the main body of the works.
