Completion

September 2007

Total Construction moved its Melbourne office from Abbotsford to Richmond to cater for the controlled development of the business. The office is on the second floor of a newly constructed commercial complex. We took the opportunity to design a modern functional open plan office that will enable future expansion. The fit out was completed utilising our own resources.

A clever use of glass and plaster partitions has allowed for individuals and groups to work together without losing the team feel. One feature of the office is the 'illuminated' reception desk which reinforces the company's ethos of 'Concept to Completion'. This is the second such example of an in house office fit out and follows on from the successful completion of the NSW office.

The design and fit out at Richmond was completed within 5 weeks from taking possession.

Total Construction has a high level of satisfaction amongst its repeat clients and this new location enhances our ability to take advantage of new markets and opportunities.
