

# AeroPearl Air Hangar & Office

*Brisbane Airport, QLD*

Renovation of AeroPearl's  
air hangar and office.

## PROJECT DESCRIPTION

This project will be completed in two stages, comprising:

### Stage One - Equipment Store and Engineering Workshop.

Starting with the removal and relocation of services including the removal of the shipping container, air compressors and air conditioning as well as demolition and clearing of other items to provide a clean field for civil works to commence.

Civil works comprise pad cutting and detailed excavation for the installation of re-routed storm water lines, followed by framing and installation of the required reinforced footings and concrete pour.

Following this, we will relocate the Avionics Area, ensuring that the facility remains operational.

### Stage Two - Main Office Renovations.

The internal main office renovation will be completed by dividing the works into three sections to separate the construction team from AeroPearl working areas and staff.

## OVERCOMING CHALLENGES

Working in a live facility, the main challenge is to ensure little or no impact on the continuity of the operations.

## CLIENT

AeroPearl Pty Ltd

## PROJECT VALUE

\$1.06 million

## CONTRACT

Construct Only

## COMPLETION

June 2014
