

UGL Waste Water Treatment Plant

Shoalhaven, NSW

Construction of 12 buildings
across 2 waste water
treatment plant sites

PROJECT DESCRIPTION

UGL completed the construction of two plants for Shoalhaven Water, as part of the Shoalhaven City Council. Together the plants are \$100M in value, with Nowra at circa \$60M and Bomaderry at circa \$40M.

This project involved the construction of twelve buildings across two Waste Water Treatment Plant sites (WWTP) - six buildings for the Bomaderry WWTP site and six buildings for the Nowra WWTP site.

CHALLENGES

One of our challenges was operating within a live and operational site. This meant deliveries were coordinated to within a few hours, and the regional nature of the project exacerbated compliance with the requirements. Movement of people, materials and machinery around the site was constantly planned and re-planned.

INNOVATIONS

This is the first time we operated in a 'sub-contractor' position under a head contractor. We adapted our systems to reflect this situation during the project, and the client was appreciative that our documentation was generally superior than their usual subcontractors.

CLIENT

UGL Pty Ltd

PROJECT VALUE

\$3.4 million

CONTRACT

Construct

COMPLETION

January 2018
